

28 November 1956

MEMORANDUM FOR: The Committee

25X1A

FROM: [REDACTED]

SUBJECT: For Committee Action of 29 November 1956.
Suggestion No. 1487

The suggester recommends that a non-skid wax be used for waxing the floors, to prevent accidents.

At the June 28, 1956 Committee Meeting it was requested that Public Buildings Service be asked to determine if a non-skid wax is available. The check to be handled by/through Central Intelligence Agency Safety Officer.

The Central Intelligence Agency Safety Officer, OS [REDACTED] reports that this matter has been taken up with General Services Administrative Superintendents in the Monument & State Groups of Buildings, as well as with General Services Administrative Safety Officer, and because of the high rate of this kind of accidents in the Central Intelligence Agency, they are making every effort to educate and supervise their waxing crews to insure correct application of wax in the Agency Buildings. However, the Safety Officer will continue to work closely with Public Buildings Service to find a lasting solution to the problem.

25X1A

EXECUTIVE SECRETARY OF THE SAS recommends disapproval for an award as the problem was recognized and was being worked on prior to receipt of the Suggestion.

25X1A

COMMITTEE ACTION

At its meeting of 29 November 1956 the CIA Suggestion Awards Committee disapproved 1487 for award for the above reason.
